INTERNSHIPS

Fortinet Technologies | June 2024 - July 2024
- During my internship at Fortinet, I gained hands-on experience in cybersecurity, particularly in network security, endpoint security, cloud security, and security operations. The training was structured around the Fortinet Cybersecurity Framework (FCF) and covered a wide range of security solutions, including FortiGate Next-Generation Firewall (NGFW), FortiAnalyzer, FortiEDR, FortiSIEM, FortiSOAR, and FortiSandbox.

PROJECTS

Diabetes Predictor Using ML | January 2025 - April 2025
- Developed a machine learning model to predict the likelihood of diabetes in individuals using medical data inputs such as glucose level, BMI, age, insulin, and blood pressure. Employed algorithms like Logistic Regression and Random Forest, using the PIMA Indian Diabetes dataset. Implemented data preprocessing, feature scaling, model evaluation (accuracy, precision, recall), and hyperparameter tuning to improve performance.

College ERP System | August 2024 - October 2024
- A College ERP (Enterprise Resource Planning) System is a software solution designed to automate and streamline various administrative, academic, and financial processes within a college or university. It integrates multiple departments, such as admissions, student records, faculty management, library, finance, and examinations, into a single platform.

Car-rental Service | February 2024 - April 2024
- A Car Rental Service is a business that provides vehicles for temporary use, allowing customers to rent cars for a specific period, ranging from a few hours to several weeks. These services cater to individuals, tourists, businesses, and organizations needing transportation without the long-term commitment of ownership.

AWARDS AND HONOR
- I played as a taluka-level kho-kho captain, leading my team with strategy and determination. Particaped in many BGMI tournament.

ACHIEVEMENTS
- All rounder, Winner in a BGMI Tournament in B.Tech/B.E.
